1/ Prices are for 100 pounds of milk of 3.5 percent butterfat content. Prices are listed generally for the major city in the marketing area; see footnotes on page 24 for these locations.
2/ The fluid differential is the amount added to the basic formula price to determine the Class I price. The basic formula price is the Minnesota-Wisconsin price for the second preceding month adjusted to a 3.5 percent butterfat content. See table 19.
3/ Tied to the St. Louis-Ozarks order.
4/ On January 1, 1983, the new Southwest Plains order became effective. The market results from the merger of the Neosho Valley, Wichita, Red River Valley, and Oklahoma Metropolitan markets, and an accompanying marketing area expansion.

1/ "Consumer Prices: Energy and food," BLS, U.S. Department of Labor. Regions are defined as the four census regions. According to BLS, average prices are best used to measure the price level in a particular month, not to measure price change over time. To measure change over time, the Consumer Price Index and its component indexes for individual items are more appropriate. The average food prices included in this table reflect variations in brand, quality, and size among geographic areas. BLS suggests that users of average food prices should be aware that these differences exist.

2/ Prices are per 1/2 gallon.

3/ Prices are per pound for Grade AA, salted, stick butter.

4/ Prices are per 1/2 gallon for prepackaged, bulk, regular.

5/ Prices are per 1/2 pint for natural, fruit flavored.

MAJOR ORDER ACTIONS, DECEMBER 1982

Suspensions:

Lake Mead - December 8 (47 FR 55201, 12/8/82). This action continues for the months of December 1982 through March 1983, a previous suspension that removed the limits on the amount of milk that a cooperative association or other handlers may divert to nonpool plants.

Oklahoma Metropolitan - December 27 (47 FR 57443, 12/27/82). This action reduces for the month of December 1982, the amount of milk that a supply plant must ship to a distributing plant to qualify as a pool plant. The supply plant only needs to make one shipment in order to qualify.

The limitations on diversions of producer milk also are removed for December 1982.

Oregon-Washington - December 30 (47 FR 58216, 12/30/82). This action continues for the months of January through April 1983, the effect of a previous suspension by removing the limitation on the amount of milk that a cooperative association or other handlers may divert to nonpool plants.

Amendment:

Middle Atlantic - December 1 (47 FR 51731, 11/17/82). This emergency action increases the limitation on diversions from 30 percent to 40 percent of a handler's milk supply during any month of September through February.

Temporary Revision:

Nebraska-Western Iowa - December 8 (47 FR 55200 12/8/82). For the months of December 1982 through March 1983, the minimum supply plant shipping percentage requirements are temporarily lowered from 40 percent to 30 percent of the milk received at the plant.

For the same December 1982 through March 1983 period, the limitation on the diversion of producer milk is increased from 40 percent to 50 percent of the milk received at or diverted from a pool plant.
